

Dear Colleagues,

The Annual Panhellenic Congress on Thoracic Diseases has been established as the most important scientific event held in Greece for pulmonologists, thoracic surgeons and paediatric pulmonologists.

Since its establishment in 1984, it has provided a unique forum for presentation of scientific research, an opportunity to review the latest knowledge on the whole spectrum of lung diseases, and a venue for informal sharing of information and research experience with Greek and foreign expert colleagues.

The 21st Panhellenic Congress on Thoracic Diseases, scheduled for November 2012, aims to continue this tradition of excellence and is due to take place in Thessaloniki. Built in 315 BC and named after the sister of Alexander the Great, Thessaloniki is the second largest city in Greece, rich in Ancient Greek and Byzantine monuments.

On behalf of the Executive Committee of the Congress, we cordially invite physicians of related specialties as well as active scientists, to attend the Congress and take the opportunity to present original papers on every aspect of thoracic medicine, both basic and clinical.

To improve the knowledge on diagnosis and management of thoracic diseases the Congress faculty will also offer a number of State of the Art lectures and interactive educational sessions including two ERS postgraduated courses. We look forward to meeting you at Thessaloniki on 1-4 of November 2012!

On behalf of the Hellenic Society of Respiratory and Occupational Chest Diseases

Kostas Zarogoulidis MD, PhD, FCCP
